They Leave

By Paula Puddephatt

They all do, in the end. They leave. Abandon. Move on with their "own lives".

Jane honestly doesn't know what that even means. "Own lives"? Everyone has those already. It is whether or not to remain connected to one another that is really the point in question, surely?

All Jane knows is that everyone abandons, in the end. She, for her part, has no intention of ever trusting anyone again. She is done.
